

Generative Software GmbH, automation of software development and operation of cloud systems

With our patented development method, we permanently connect your company to the Mobility Data Space: for fast, reliable data exchange.

1. We offer the following services from the Trusted Partner portfolio:

Selection	Category
	a) Ideation and business development
x	b) Hosting and operation
x	c) Integration and data management
x	d) Software development

2. Why are we the ideal Trusted Partner for you? How do we stand out from the competition?

Generative Software GmbH has been involved in the development of the Mobility Data Space from the very beginning. The acquired know-how is combined with expertise in the automated development and operation of service interfaces for data exchange. Through patented automation tailored specifically to the Mobility Data Space, Generative Software GmbH delivers high-quality, cost-effective connectivity that is virtually impossible to achieve by conventional means. Generative Software GmbH's experience in system design and operation of cloud systems leaves no questions unanswered.

3. What experience and references do we present in the offered service?

- Support of highQ Computerlösungen GmbH in connecting their services to the MDS
- Collaboration in the research project Bauhaus Mobility Lab (connection of customer systems to the lab platform via IDS)
- Collaboration in the research project GAIA-X 4 ROMS (networking of project partners in the GAIA-X data room, creation of connectors)
- Operation of a cloud infrastructure of a well-known sporting goods manufacturer
- Operation of our patented Virtual Developer cloud infrastructure

4. Service Description

- Software development
 - Applications for providing data of one company
 - Applications for consuming data of other companies
 - Applications for registering services for providing data of a company
