

Startin'blox - App builder for Data Spaces

We bring data spaces to life. We offer data standardization and open-source distributed web applications for intuitive data flows among ecosystems of partners.

1. We offer the following services from the Trusted Partner portfolio:

| Selection | Category |
|-----------|--------------------------------------|
| | a) Ideation and business development |
| | b) Hosting and operation |
| x | c) Integration and data management |
| x | d) Software development |

2. Why are we the ideal Trusted Partner for you? How do we stand out from the competition?

With our expertise in data standardization, we help our clients modelize their data exchange based on their real-life use cases. We help them organize their data and build the applications that enable them to interact with this data. Our modular design ensures both data privacy and security in exchanging data with your partners.

3. What experience and references do we present in the offered service?

We work with Tamis (Media in France) and Prometheus-X (skills in France). We also have experience with 30 clients building federated applications in many different industries, like the European Space Agency or Cooperatives Europe.

4. Service Description

We help our clients define and modelize their data exchange use cases inside their data space, deploy relevant and highly performant infrastructures and develop intuitive applications they need to connect to the data space.

5. Scope of Services

They can take several forms, depending on the use cases:

- Data modelization
- Cleaned and standardized data repository
- Infrastructure connected to the data space
- Apps interacting with the data space

6. Pricing

To be defined, depending on the client's needs.

Web application hosting and maintenance starting at 350 euro / month.
