

# T-Systems International GmbH – Unlock the value of data on your terms

Easy to use, secure managed dataspace services, from connection to data sharing, Gaia-X compliant and IDSA certified from Data Intelligence Hub (DIH), the dataspace pioneer of Deutsche Telekom.

## 1. We offer the following services from the Trusted Partner portfolio:

Selection	Category
x	a) Ideation and business development
x	b) Hosting and operation
x	c) Integration and data management
x	d) Software development

## 2. Why are we the ideal Trusted Partner for you? How do we stand out from the competition?

Our solutions are optimized for data sovereignty protection with the reliability of industrial strength technology based on our pioneering development work in core dataspace technology projects like Eclipse foundation and Catena-X. We double down on data sovereignty protection with IDSA certification and Gaia-X compliance. In order to achieve Gaia-X compliance T-Systems will offer the Gaia-X Digital Clearing House, thus becoming one of the first in Europe to verify digital credentials for Catena-X data space participants, for example. We will also provide additional sovereignty protection with a “sovereignty all the way” option to host your sovereign dataspace connection in Sovereign Cloud based on Google Cloud Platform. On top of it our pioneering development work over the past 5 years across key Gaia-X lighthouse projects has allowed us to maximize maturity, reliability, and ease of use of our service offerings.

## 3. What experience and references do we present in the offered service?

We are the pioneers and leading contributors for the top 3 Automotive Data Space initiatives in Germany and Europe:

- **Mobilithek** ([link](#)) with MDS link ([Link](#)); and award-winning RealLab where we built a mobility super-app demonstrator enabled by a first, IDSA-based dataspace ([link](#))
- **Catena-X** driven by industry with new dataspace tech, such as EDC ([Link](#)) **Gaia-X 4 Future Mobility** driven by R&D and science with Gaia-X emphasis ([Link](#))

Additionally, our smart mobility microsite gives further details into our thought leadership in the areas of data-driven mobility and automotive ecosystems.

#### 4. Service Description

Telekom Data Intelligence Hub serves customers with an end-to-end 360° approach ranging from advisory to standard products as a managed service. Our offerings:

- b) **Get Connected “DIH Data Space managed services and products”**: Our standard managed services solutions are architected, designed and developed in a way to provide the customers with utmost flexibility and lowest of the entry barriers. With our managed services we strive to make sure that it is not the technology and/or usability which stops our customers from utilizing the full potential of their data as well as the data-driven ecosystems. Keeping this in mind, our architecture and customer experience process has incorporated cloud agnosticity and on-prem deliverability right from the start. To top it off, we are the only provider in DACH so far to offer a full sovereign stack based on GCP.

Customer benefits at a glance:

1. Industrial strength data sovereignty, the power to maintain control over one’s rights to data
2. Doubling down on sovereignty with optional sovereign-all-the-way infrastructure based on Google Sovereign Cloud
3. IDSA certified, fully GAIA-X compliant
4. Easy-to-use, cloud-agnostic, plug-&-play, customizable and personalized UI, built-in interoperability with other data spaces
5. No vendor-lock in: We provide you with state-of-the-art managed services based on open-source components: you like our services, you stay with us
6. **The Magenta Advantage**: Managed services, operated and backed by Deutsche Telekom – the European communication leader, and T-Systems network

## 5. Scope of Services

b) **Get Connected** – managed services to connect to data space: Our customers can use our plug and play based components to get connected to data spaces via our standardized managed services and products. The connection family comes in varying flavours to best fit the customer requirements and get them onboarded into a data space in minutes with our 5-click approach from discovery to access. The three product families with varying features:

- **Connect Starter (provisioning in minutes):**
  - 1 connection to data spaces
  - Simple & trusted data exchange
  - Data offer & simple policy management
  - Trust Level (based on European Policy)
  - No coding skills/IT know-how
  - No massive IT budgets/costs needed
  
- **Connect Comfort (provisioning in minutes)**
  - Many connections
  - Advanced UI + additional data comfort capabilities (integration & transformation)
  - For businesses existing IT infrastructure (on-prem)
  - Need for choice of cloud infrastructure
  - Advanced data source (150+) integration capabilities
  - Sovereign-all-the-way with Google Sovereign cloud
  - Maximized Trust Level +
  
- **Connect Choice (Bundles)**
  - Flexibility to pick and assemble own components and features
  - Additional preconfigured bundles for Mobility Data Space
    - MDS for SMEs
    - MDS for OEMs
    - MDS Family Plan
  - Low entry barrier + fast & easy access to the Mobility Data Space
  - Hybrid model on Any Cloud + On-prem

## 6. Pricing

b) **Get Connected:** Plug and Play products and solutions to get customers easily onboarded into Mobility Data Space. The DIH Connect product family starts with very **affordable fixed**

**monthly rate + the option to pay-as-you-go** for all sizes of enterprises, with options to upgrade and adapt based on comfort functions and features.

*Disclaimer:*

1. *Final pricing to be announced in Q1/2023.*
2. *Discounts are available on the bases on volume, payments based on terms & conditions such as pre-payment, duration etc. Prices are subject to change based on our T&C. Contact us to know more about the price breakdown:*
